Court Of Honor Held For Advancing Scouts

A Court of Honor for Boy Scout Troop No. 23 was held Tuesday night in the Lions building in Pahokee. Officials present were: C. M. Gaskins, Scout Executive of the Gulfstream Council, Scoutmaster Clyde Brown, District Chairman Paul Rardin, Vice Chairman John Elbon, Executive Board Member M. I. Keen, District Commissioner Al Beverly and Advancement Chairman Robert Lampi.

Many parents of Scouts were present for the evening's program which proved highly educational in Scoutdom to those present. The troop members gave visitors an idea of how Scout meetings are conducted when they took charge and opened and closed a short session, following which officials took over and presented various merit badges and classifications.

Wayne Unwin received his Tenderfoot badge in the first presentation. After this part of the program 14 boys were called up for advancement to Second Class Scouts. They were: David Simmons, Lonnie Clay, Harry Brooks Elarbee, Harry Sheppard, Val Gabeldon, Freddy Blakey, Earl Kelly, Alfred Kahn, Clyde Alley, Jr., Rupert Mock, Jr., James Stamps, John Guerry, Trip Alderman and Gordon Chase.

Max Beverly received five merit badges which he had earned over a period of several months. The badges were for woodcarving, reading, bookbinding, bird study and firemanship. These brought his total high enough that he became a Life Scout, only one rank away from Eagle Scout.

Pioneer Growers New Plant To Soon Be Put In Operation

The new \$600,000 modern fireproof packing and precooling plant of the Pioneer Growers Cooperative, Belle Glade, under construction for several months, is just about ready for occupancy.

The new building has been erected on a 66-acre plot located north of Belle Glade city limits on the airport road.

It was designed by the Lakeland Engineering Associates, Inc., Burt Roemer of Belle Glade is the contractor in charge of construction. It is a two-story concrete and steel structure of impressive proportions—343 feet over all from front to back, and 262 feet wide, with a height of 43 feet to the top of the tower where water is vented for the pre-cooling system. Forty car loads of vegetables can be handled daily.

A railroad siding at the rear will accommodate 52 refrigerator cars. Trucks will be served by ample loading platforms.

Two washing machines and packing conveyors at the front or narrower end of the building will receive the vegetables from a fleet of field trucks, after which they move to the cooling room for storage.

Five hundred horsepower is required to operate the compressors which circulate the cooling liquid. The building is all open, and the products come from the fields to four platforms for processing.

Chief among the 24 crops the plant will process are celery, cabbage, escarole, chicory, green beans, sweet corn, egg plant and peppers. Two million packages of fresh vegetables were shipped last year by the firm.

The Pioneer Growers Cooperative has a membership of 24 who are engaged in growing and shipping produce adaptable to the Everglades region.

Lake Okeechobee Is Opened For Seins After Six Years

Closed since 1946, Lake Okeechobee last week was reopened to commercial seining for bream, perch and crappie under strict control, the Associated Press reported from Tallahassee.

The action came at a meeting of the State Game and Fresh Water Fish Commission, which also lifted a seining ban from four other Florida lakes. The board adopted resolutions permitting use of nets for a three-year period to take the panfish from Lake Okeechobee, Lake George, Lakes Eustis and Harris in Lake County and Polk County's Reedy Lake.

Fish taken from the five bodies of water will be tagged by Game Commission crews before they are sold. To prevent sale of bream, perch and crappie from closed waters, no fish may be held without the tag.

The Game Commission acted after sports and commercial fishermen presented all the old pro and con arguments that have raged for seven years on the question.

Cinematic Chatter

By Malcolm Millar

Lovely Judy Holliday has had her laugh and hasn't lost her knack as a whiz on skates. Judy was watching her leading man, Aldo Ray, try to keep on his feet in a skating scene in the picture they are making. Seeing he was not doing so well keeping his balance she asked him to lend her the contraptions. Aldo, thinking to have some fun, took off his skates and fastened them on Judy's feet. Judy got up, did some fancy speed skating across the stage, turned a fancy spread-eagle and wound up with a fancy figure eight. "Hey, that's some skating," cried Aldo admiringly. "And why not?" answered Judy with a grin. "When I was a kid in the Bronx I was the rollerskating champ of Bryant Avenue." The grooming of a girl or boy for movie stardom generally covers such things as skating, both roller and ice. In fact to be successful and able to fill the requirements of the roles you get in pictures one must be accomplished in many sports, in music and even in painting. They are put through an extensive training under expert tutors, attending classes from eight each morning until five in the afternoon, and really work harder than most people do in offices or trades. But when you have your eye on the top rung of the ladder you don't mind the work it entails, for you know when you have reached that exalted peak of stardom, despite all the hard work, you will have plenty of time to relax in the backyard swimming pool and to enjoy the luxury of a home, you only thought existed in fairy stories. See you at the movies—Mal.

National Guard Heads In State To Retire

ORLANDO—A program for the observance of National Defense Week in Florida, Feb. 12-22, is being prepared under the direction of the Reserve Officers Association, according to Lt. Col. A. P. Phillips, Jr., president of the Florida department.

"The period between Lincoln's and Washington's birthdays" will again mark the traditional spotlighting of the nation's defense needs and plans," said Phillips, "and represents return to those long established dates."

Phillips pointed out that the week was celebrated immediately preceding Armed Forces Day in May in 1930 and 1931. The association believes that complete separation of the two occasions will better serve the objectives of both. "Today as never before," he said, "the manpower and material needs of our armed services is the problem to every American—not just of the professional core of regulars in the Army, Navy and Air Force. Our reserve elements and National Guard constitute the real decisive factor in our defense plans."

Tourists Will Bring Lots Of Dough To Fla.

TAMPA—Florida visitors will be more economy-minded this year but they still will bring more than a billion dollars to the state if the pace set last year continues.

This is the opinion of Marvin L. Holloway, manager of the Tampa Motor Club, which serves 17 counties. He noted that winter sunshine seekers today favor a mobile vacation which fits into a limited travel budget. They visit more places, remain in each place a shorter period of time.

Holloway said his organization served 28,950 visiting AAA members in 1931-1932, 18 per cent more than 1930. The Motor Club manager said income from last year's visitors amounted to about \$855 million.

If the percentage of increase holds true in 1932, Holloway predicts tourist dollars will easily be the billion mark.

The government has issued new regulations increasing retail ceiling prices on beer an average of a penny a can.

Florida Oranges Go To Minneapolis

JACKSONVILLE—A touch of Florida sunshine arrived in Minneapolis last week just in time to help combat the season's worst snowstorm and sub-zero temperatures.

Recipient of the "sunshine" was Jeneeth J. Johnson, an English instructor at Columbia Heights High School, who received a crate of Florida's finest "eating" oranges through the combined efforts of A & P Food Stores, the Florida Chamber of Commerce and the Florida Chain Store Council.

Mr. Johnson recently wrote to the Chamber in Jacksonville, pointing out that the state had built its reputation as a producer of fine oranges, but the Johnson family never had been able to purchase Florida "eating" oranges in the Minnesota metropolis.

The Chamber and the Chain Store Council immediately arranged a citrus recipe book to Mr. Johnson, explaining the virtues of this state's oranges for a multitude of tasty dishes. A & P then was contacted and the 93-year-old food firm expressed a crate of Florida pineapple oranges to its Minneapolis office from Lakeland. Norman Stover, the Company's produce specialist in the Midwestern city, presented the oranges to Mr. Johnson.

National Defense Day To Be Observed

ST. AUGUSTINE—Florida's two top-ranking active National Guard officers will retire next month, with Maj. Gen. Sumter L. Lowry of Tampa relinquishing his command of the 51st Infantry Division and Maj. Gen. Joseph C. Hutchinson of Sanford terminating his command of the 48th Infantry Division.

General Lowry is completing more than 37 years of military service and has been active in the National Guard since 1941. He was on active duty in both wars. He retires February 1.

General Hutchinson ends 33 years of service all of which time he was active in the National Guard since 1941. He was on active duty in both wars. He retires February 1.

General Hutchinson ends 33 years of service all of which time he was active in the National Guard and served in two wars. He retires February 29.

Both have been commended in resolutions adopted by the National Guard.

General Lowry was cited for his exemplary conduct and the fact that he has served "as a model of the high traditions and illustration of the true concept of a citizen soldier."

General Hutchinson was praised for his faithful service, "forceful personality, firm policies and alert leadership which have immeasurably strengthened the fabric of the Florida National Guard."

No Major Highways For State In 1932

TALLAHASSEE—Florida counties can expect very little in the way of brand new highways this year.

State Road Department Chairman Alfred McKethan made it plain as the road board opened preliminary hearings on its 1932 budget that money is not available for construction of major new highways.

He told several delegations asking for new highways that present road department revenues will hardly take care of the costs of maintaining and improving the present highway system, and discouraged hopes for major new roads.

DUNNELLON—Pre-season predictions for a new record tourist business this winter received strong emphasis today as Rainbow Springs, one of Florida's fastest growing attractions, revealed sharp increases in all departments during the first half of January as compared with the same period a year ago.

Citrus By The Pound

LAKELAND—A plan to educate consumers to the advantage of buying Florida citrus by the pound is being launched by United Growers and Shippers Association. The campaign will be similar to one waged by the banana industry four years ago to change buying habits. During the past few years, fruit has been shipped in five and eight pound mesh bags, but the total last year shipped that way came to only three million boxes out of a total of 31,500,000 boxes sold in all types of containers. Tests have shown that a pound of oranges yields seven to eight ounces of juice, with 10 pounds providing two and a half quarts.

Blue Devil Netters Have A 50-50 Record

The Pahokee Blue Devil basketball team won games from Clewiston and Okeechobee on Friday and Saturday nights and lost their return game with the Belle Glade Rams at Belle Glade Tuesday night.

This gives Coach Bill Howard's Blue Devils a season's record of six games won and six lost or .500 to date as they travel to Lake Worth this Friday night to battle the Lake Worth Trojans, defending champions of the Suncoast Conference, who are leading the conference race again this year.

On Tuesday night, Feb. 12, the Blue Devils will play a return game with the Seacrest Seahawks in the local gym, the B preliminary to start at 7 p. m. Starting Thursday of next week the Blue Devils will participate in the Suncoast Conference tournament, Feb. 14-16.

Brings Gettysburg Address Up To Date

MIAMI BEACH — Thomas F. Smith, director of Miami Beach Convention and Publicity Bureaus, in his welcome to the State Assembly of the Florida Branch, United World Federalists, amended Lincoln's Gettysburg Address to make it timely.

Smith's version is as follows: "Eight score and fifteen years ago our fathers brought forth on this continent a new nation, conceived in liberty and dedicated to the proposition that all men are created equal. We have completed a great world war and are now engaged in Korea in what may become a third world war, testing whether that nation, or any other nation, so conceived and so dedicated can long endure. We here highly resolve that humanity under God shall have a new birth of freedom and that governments of the peo-

ple, for the people and by the people shall not perish from the earth."

One ride and You'll say:

"That's the Smartest Million Dollars BUICK Ever Spent"

WHEN we tell you that every 1952 Buick rides like a million dollars, we're not just slinging slang—we're talking real money—right-on-the-barrelhead cash.

A million dollars and more were poured into research and testing—design and tools—engineering, production and components—to team up the combination of ride features you'll find on a Buick—and on no other car in the world.

A million dollars and more was the price paid to work out control of end-sway and side-roll on curves—to double-check vertical "throw" with shock absorbers and big soft-acting coil springs for all four wheels—to V-brace the torque-tube keel and X-brace the

frame—to cushion body and engine—and to silk out the whole operation with Dynaflo Drive.*

You may not care how the job was done, or what it cost. But we'll lay you this:

You're going to say "thanks a million" to Buick engineers once you get this spirited smoothie under your hands and haunches.

Old familiar roads take on a new smoothness. Gone are the weave and wander, the jitter and jounce that you've felt in lesser cars. You ride with road-hugging assurance and level ease.

All of which only begins to tell you what really great cars these 1952 Buicks turned out to be.

Never before have style and stamina—comfort and character—power, performance and price been brought together with such satisfying skill.

The obvious thing for you to do is come in and look them over. How about taking half an hour off to do that—today?

Christian Science Group Of Canal Point

Theme of services to be held in all Christian Science churches next Sunday is that the ever presence, all-power and infinity of Spirit, or God, is to be acknowledged at all times by every follower of Christ Jesus.

The subject of the Lesson-Scripture is "SPIRIT".

A verse from Psalms provides the Golden Text: "Teach me to do thy will; for thou art my God: thy spirit is good; lead me into the land of uprightness" (Ps. 143: 10).

Selections from the Bible include: "Grace and peace be multiplied unto you through the knowledge of God, and of Jesus our Lord" (II Pet. 1: 2).

Among correlative passages from "Science and Health with Key to the Scriptures" by Mary Baker Eddy is: "Every day makes its demands upon us for higher proofs rather than professions of Christian power. These proofs consist solely in the destruction of sin, sickness, and death by the power of Spirit, as Jesus destroyed them" (p. 233).

Rogers Grateful For Renomination Without Opponent

Upon being renominated as a member of congress from the Sixth district of Florida, Dwight L. Rogers of Fort Lauderdale, issued the following statement:

With all humility I am deeply grateful for the confidence the people of the 6th Congressional District have shown in me as reflected in the fact that they are al-

lowing me the Democratic nomination for reelection to Congress without opposition. I consider this a distinct honor.

In return for their confidence I pledge to them again that continued service will be my watchword and goal. My experience and seniority in service will be of value to me in the 83rd Congress, and enable me to be of more help to my people.

The fact that I have no opposition in the Primary affords me an opportunity to devote my full time, thought and energy to legislation which is vital and urgently needed in the interest of all Florida, our District and the Nation.

Never in the history of this Nation have we been in the midst of such grave and troublesome times and I covet the cooperation, the assistance and help of each of you in solving our problems. I am confident that with Divine Guidance we can solve these problems.

From where I sit... by Joe Marsh

Experienced Hand Wanted

Cappy Miller's back from visiting relatives and tells about a big snow storm that knocked out the electric power for miles around.

Naturally, the local power company was doing everything possible to restore service but folks kept calling in and one woman gave them a new twist.

"I don't mind not having lights," she grumbled, "but I've got 20 cows in my barn and they all have to be milked by machine. Nobody around here knows how to milk a cow by hand any more."

From where I sit, it's only too easy to forget how to do something—even as simple as milking a cow—if we don't keep at it. And that goes for practicing tolerance, too. Like forgetting our neighbor has a right to decide for himself whether or not to enjoy a temperate glass of beer. If we don't keep the other fellow's point of view in mind we're all liable to get "snowed under" by intolerance.
